Project : The Restaurant Website

DESCRIPTION

Created a restaurant website using HTML and CSS. The website contains the restaurant's menu description, the login page, and contact information. Our restaurant serves declivous food from many countries like Indian, Italian, Japanese and Chinese. This website will help the restaurant manage it to gain more attraction through online mediums.

Home Page

It contains information about the restaurant. Background image and opacity of about section are applied using CSS tag's HTML tag used are Flex, Display, Background-size=cover, background-position=centre, cursor=pointer, You can access the Menu and Contact section using top right corners which are links with white color created using CSS text-decoration tag.

The Menu section is created using display-Flex, Padding, Box-shadow, and Text-align tags.

The Contact section is created using Background, Background-position=centre, Background-size= cover, height= 20vh, border-margins = padding, Display= block tags.

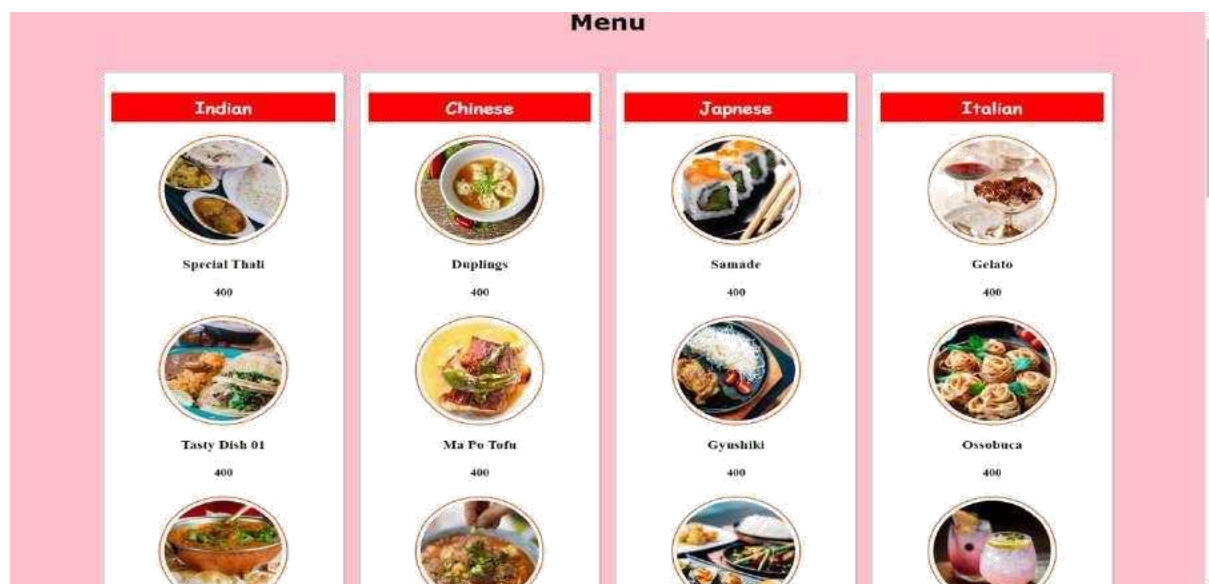

The Login sections are created using a Background image, Background-position= centre, Background size = cover, height – 20vh, border-margin = padding, Border-radius, Background-color, and Opacity.

About us

The about section is created using, display-flex, Align-item-centre, margin, padding, box-shadow, height tags.
